Time is the factor and as a professional working learner every person according to their job specification add features and learn with their folks during course and improve on loopholes and then think of adding extra knowledge through direct interaction, it becomes subjective .Along with theory , application based studies helps to build careee but then big factor of time and willingness place a major role and also purpose of joining some have appraisal , learning purpose, just additional degree and the gap between doing course and using the course and outdated syllabus if any .
